

CONNECT is 100% polypropylene and inherently displays all the necessary characteristics of the "high-performance" required for commercial applications on seating, partitioning, screens, panels and pinboards.

- easily recyclable back to original "tablet form" at end of life
- 3 year manufacturers guarantee
- inherently fire-retardant to AS/NZS 1530.3
- resistant to deterioration from chemicals, perspiration and moths
- inherently highly resistant to static, moisture, mildew and rot
- extremely cost effective

specifications

content:	100% polypropylene
width:	158cm +/- 2% useable
weight:	352 grams per lineal metre +/- 5%
piece length:	approximately 60 metres

performance

surface abrasion:	in excess of 50,000 cycles Martindale
light fastness:	6 (bs 1006 1990)
pilling resistance:	grade 5 (no pills)
fastness to rubbing:	wet: 3+ dry: 3/4 bs 1006 (1990)

flammability

AS1530 part 3
spread of flame index (range 0-20) ranger 0
smoke developed index (range 0-10) ranger 5
performance is dependent upon foam used

general care

Vacuum all furniture regularly to prevent dust build-up and fibre migration. Most stains on fabric can be readily removed by spotting with lukewarm water and where necessary, highly diluted detergent. Solvent type cleaner can be used for oil-based stains with caution. Any cleaning agents must be used strictly in accordance with manufacturer's instructions. It is advisable to vacuum before cleaning to remove loose dirt and dust. Clean stains from outside in.

Apply fabric in same direction. Colours may vary slightly between dye lots.

our environment

cloth nz cares about the environment. We strive to be more efficient by recycling and using less resources. Where practical, please donate used samples to any charities and education facilities including pre-schools, primary schools and aged care for arts and crafts.
